# Factors of Safety

The human body is a wonderful machine, provided with muscular, nervous and mental energy far in excess of normal needs. In health, the organs and tissues can do double their usual amount of work without strain or friction, because they have stored energy to meet the extra demand.

When you feel "all tuckered out," these factors of safety are nearly exhausted and you need to resort to

Indigestion, bilious attacks, constipation, loss of sleep, ner-vousness, dizzy spells, are warnings that the factor of safety in the stomach, liver, bowels or brain, is low, or nearing the danger point and needs to be replenished.

Beecham's Pills increase the supply of blood, strengthen the stomach, operate the bowels, feed the nerve cells, build tissue, and create a reserve supply of energy, which is the only natural and effective way to

A charge is extremely dangerous, almost always fatal when unexpected, either because of the dense vegetation or other causes, but if you see the animal getting ready flight is useless.
